

MATHSCITY LEEDS

February Half Term Activities

[BOOK NOW](#)

15th - 17th: Craft Weekend - Friendship Bracelets

Discover how a simple mathematical algorithm and some multi-coloured wool can create an amazing friendship bracelet that you can take home with you! A perfect addition to a visit to one of Trinity Shopping Centre's "Craft Clubs".

18th - 20th: Mind Games: Your Brain on Puzzles

Join us to explore the neuroscience behind solving our range of hands-on interactive puzzles! Between 15:00 and 17:00 each day we will be joined by students from the University of Leeds to scan visitors' brains using an EEG.

21st: A Skirt In Suspense

In this drop-in creative workshop participants will be invited to consider how they would approach creating a skirt to fit over a 160cm tall scissor lift. The workshop will be led by Manchester based performer, producer, and writer Keisha Thompson, and is inspired by one of Keisha's music videos, as seen [here](#).

22nd - 23rd: Our Chaotic Oceans: Wave Tank

Dive in and explore the Earth's chaotic oceans and explore the mathematics behind flood defenses with MathsCity's wave tank! This is the first time the wave tank will be alongside our Future Mobility Simulator and Internal Wave exhibits, perfect to further explore the fluid dynamics of waves or mathematics of city design.
